

Johann-Wilhelm-Ritter Award 2016 for Innovative Skin Imaging

sponsored by JenLab GmbH

**Rainer Voegeli from DSM Nutritional Products Ltd. in Switzerland receives
Johann-Wilhelm-Ritter Award 2016 for Innovative Skin Imaging**

Johann-Wilhelm-Ritter Award 2016 was presented during the World Congress *International Society for Biophysics and Imaging of the Skin (ISBS)* at Lisbon to Rainer Voegeli for his outstanding presentation on **Complexity of Facial Skin Hydration Visualized by 3D Color Mapping**. The 2.000 € prize was sponsored by JenLab GmbH.

How was Johann Wilhelm Ritter?

When he was just 24 years old, Johann Wilhelm Ritter discovered the ultraviolet radiation in 1801. Becoming increasingly in the crossfire of critical opinions, he lost his reputation as a genius of physics and electrochemistry and died aged 33 as a poor man.

JenLab GmbH

The company JenLab GmbH provides femtosecond laser technology for biomedicine. JenLab pioneered high-resolution in vivo histology of skin by multiphoton tomography. The company has facilities in Berlin, Jena, and Saarbruecken.
